WELCOME TO ITD CANADA

Read about our growing family

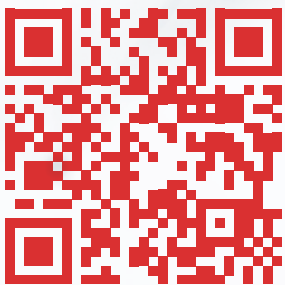

You have chosen to take a direction that will allow you to go beyond what you thought was possible, giving you the option of many new opportunities after you graduate. It will not be easy, but you are now part of our family, people who believe passionately in what they do and who have a common purpose, your academic success!

ITD Canada believes in lifelong learning opportunities as pathways for individuals to remain competitive in the labour market and contribute to a just society. Consistent with this belief, we provide programs with field experiences that prepare students for a changing world and empower them to improve it. At different stages of their careers, individuals can choose any of our up-to-date certificates and diplomas in Art, Business, Hospitality and IT to start and continue their personal growth and professional development.

Through empathy and mentorship, our faculty and staff create a safe and nurturing environment and encourage students to tap into their potential with the acquisition of knowledge and transferable skills. ITD Canada strives to offer an education that will allow our graduates to meet current and future challenges and achieve their goals.

Admissions to **ITD CANADA** require that applicants follow an application.

A procedure that ensures that enrolling students meet all program admission requirements. In this way, we believe that students will be able to make knowledgeable program and application decisions and therefore be able to meet their education and career goals. All programs have admission requirements that applicants are required to meet to be eligible for program acceptance. Applicants are required to provide original documentation to demonstrate that they meet the program admission requirements.

For a student to be exempt from a course, the student must have finished that course in a well-known education institution, a student must provide ITD Canada with a transcript and based on the nature of the course the student may be asked to write a challenge exam or submit a portfolio.

Student services

ITD Canada's Student Services makes a positive impact on a student's educational goals by helping students stay on track with their programs. ITD Canada's Student Services provides leadership and technical assistance to students. ITD Canada supports student learning, improves the college experience, and guides students through the challenges of reaching their goals easier and faster.

Academic & career advising

ITD Canada's ACA office enhances learning by providing students with a focus on academic and career goal setting and planning. It also provides guidance and assistance in program and course selection, information on the job market, resume writing, interview techniques, organization, study skills and academic achievement. ITD Canada advisors work closely with students to ensure their success.

Beyond the classroom

Experiential Learning. The "Hands-On" experience encourages students to forge relationships that support them during college and into the future. With co-op programs, field studies, and volunteer opportunities, students build skill sets, add to their resumes, and connect with potential employers. Students meet with an advisor to discuss education and career goals, and then are matched with potential co-op placements, field studies and volunteer opportunities to maximize learning and career prospects.

ITD's small room lunchroom

Relax. Refuel. Socialize. Read the latest from the Student Life Community board or check out what's trending on Twitter. Brown bag your lunch or select from the self-serve bar.

ITD Canada offers a social area for students to mingle while having a bite to eat or sipping a drink.

College achievement program

The CAP program is an integral part of ITD Canada's commitment to focus on student success by supporting academic and life skill development through tutors, study skills workshops, and organization skills sessions. Everyone at ITD Canada is committed to going the "extra mile" to help students succeed.

The computer shop

New at ITD Canada is the computer shop. Stop by with all your computer questions and needs.

Marco Di Stefano

Graphic Design Diploma

I have always loved creating images, using colours, and working with computers. When I graduated from high school, I decided to build a career based on my interests. I felt that Graphic Design would be an excellent fit and allow me financial independence. With the support from my family and the help from friends and a trusted school counsellor, I discussed the pros and cons of the Graphic Design Program offered at Metro Vancouver colleges and universities and I chose ITD Canada because of its personalized approach to instruction and co-op experience.

The Graphic Design Diploma at ITD School of Art allows me to keep developing my visual art strengths while improving and learning technical skills. IT faculty are very knowledgeable, have years of experience, and go the extra mile to share trade tips and career advice. The ITD staff worked very hard to smoothly get me through admission, registration, co-op placement, and graduation. They offer students a fantastic school community environment. There are always a few challenges along the way, but

**“I AM ON MY WAY TO WORKING IN AN
AWESOME CAREER”**

Graphic Design Diploma

More than ink, more than paper. You have left the page to conquer space, motion and interaction-you are a GRAPHIC-onaut! Your map spans the definition of artist, designer and entrepreneur. Your journey through the design process will lead you to uncover new things about yourself, work outside your comfort zone and push mediums to their limits. If the sky's the limit, then ITD Canada's Graphic Design Program is for you.

The faculty will encourage you to explore all the facets of the language of design and challenge you to create skill sets across the traditional and emerging media to create messages with impact and influence.

Your training will include co-op experience, portfolio development, and entrepreneurship skills that will allow you to successfully enter and stay in the job market.

Interior Design Diploma

Are you live and breathe design? Are you interested in helping others make their homes and work environments the best they can be? If so, then the Interior Design Program at ITD Canada is for you.

Our Interior Design Program will give you a strong theoretical background and technical skills to be versatile with projects of all scopes and sizes and tackle nearly every budget level and all kinds of demanding challenges.

Throughout the program, you will use your creativity to develop design solutions that transform ordinary spaces into magazine -worthy rooms with incredible wow factor. Your training will include portfolio development, co-op opportunity, and entrepreneurship skills that will allow you to successfully enter and stay in the job market.

Study for your career

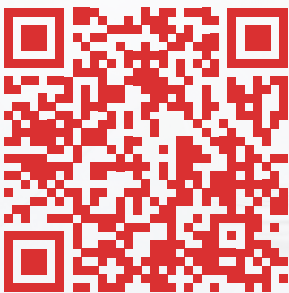

One of the most valuable benefits of graduating from a vocational career-driven college like ITD Canada is that the program you enroll in will prepare you for the industry you want to work in.

You will learn from professionals with years of experience and knowledge about your specific industry of choice, which will prepare you to meet market demands and standards. Our program teaches practical skills essential to your career choice.

Once you have gained the skills and knowledge you need to start a professional career, we then train you on how to get the job you desire in the competitive markets world. Our professional development, communication and career classes will give you the skills you need to build eye-catching and informative resumes and cover letters, as well as the confidence to be successful in interview and presentation settings. With an education from a vocational college, you are more likely to start working sooner. By knowing what skills are in current demand in the British Columbia and Canadian Market, we help equip students with the right qualifications to find the needs of the job market. A vocational college education puts you in the ideal position to kick - start your career.

Thina Gozzo

Business Administration Diploma

I can easily come up with ideas, communicate them, and take the lead to get things done. I saw myself in a job where I could be part of a team, face challenges and solve them. According to the results of a career cruising and a pathfinder tool, I had a strong aptitude for business administration. I searched for business programs that included work experience. Some institutions did not offer co-ops. Others made co-ops optional. In ITD Canada, however, students completed co-ops as a requirement for graduation.

This was the best path for me.

I like how instructors analyze a business plan in terms of Economics, Finances, Accounting, Marketing, Human Resources, Project Management, Statistics, and Law. The program challenges me to think about where the economy is going, how to keep a business profitable, to consider tax incentives, the availability of qualified employees and the opportunities in the international markets. The best part is that

**“AT ITD, I LEARN, STUDY & PREPARE
FOR A CAREER I LOVES IN A VERY FRIENDLY
ENVIRONMENT”**

Business Administration

Thinking about creating a global world that has meaning for all us? Maybe considering weighing economic challenges against social costs is some of your goals. Enjoy being plugged into your personal interests while reconciling it all with social responsibility. Take the next step and take your career to the next level at ITD Canada.

ITD's Business Administration Program prepares future managers with broad and in-depth knowledge and tools that contribute to success in and for business. Students learn to apply leadership, planning, presentation, communication, customer service, information technology, research, teamwork, problem-solving, and task management skills to support the business activities of an organization. Your training will include portfolio development, co-op opportunity, and entrepreneurship skills that will allow you to successfully enter and stay in the job market.

Accounting & Finance

Who doesn't like being part of a winning team? In the numbers universe, you are a wizard of details. Your high-level proficiency gives you the competitive edge you need to succeed in any financial and managerial accounting role at a top-notch business or financial firm.

Today's Accounting and Finance professionals must possess knowledge, experience and a well-developed set of technical skills to handle the challenges of a wide range of business environments. ITD Canada, through its Accounting and Finance Program, will prepare you to enter and succeed in the field. Your training will include portfolio development, co-op opportunity, and entrepreneurship skills that will allow you to successfully enter and stay in the job market.

Sustainable Business Management

Does talking about “green technology” get you excited? Does Sustainable business make sense today? Do all the latest cars being plugged into a new smart electrical grid in the employees’ parking lot thrill you?

Maybe you want companies to consider using a new type of cement or alternative material so their building releases considerably less carbon dioxide into the air. You are a proponent of a video conference for the management team to reduce energy consumption by 50%. Let’s chat!

Sustainable Business at ITD Canada speaks to the growing “cleantech and the green movement.” By incorporating environmental considerations into business planning, organizing, leading, controlling, strategic management and improvement in organization with a specific focus on identifying and managing trade-offs between environments and business goals, students learn about green adoption in business and industry practices. It also talks about how to make a business sustainable. You must have at least one year of education in Business Management as a prerequisite to enroll in this program.

NO NAME

H o s p i t a l i t y M a n a g e m e n t D i p l o m a

I enjoy paying attention to details, being around people, and serving their needs. Living in Vancouver, I was well aware of the many opportunities in hospitality. I aspired to more just an entry-level position. So before applying to any job, I was determined to attend a good post-secondary program.

The ITD Canada Hospitality management program impressed me. It received a certification from the American Hotel and lodging education institute. I knew that if I completed this diploma, I would pass every single quality control set by an employer. ITD offers a well-organized program with courses in Marketing, Management, Finances, Accounting and Safety. Instructors set up practical activities requiring the use of creativity, teamwork, communication and problem-solving skills. All of this prepares students to perform well in different positions across the many sectors of the industry.

I like the fact that ITD students receive personalized attention in small classes and gain work experience through Co-ops. This is an investment that will lead to a rewarding career.

“I JUST LOVE IT”

Sustainable Business Management

Service, Service, Service! Ever since you can remember, you have been a hard worker, a fast thinker and possessed a passion for people. Your eyes for detail and your burning desire to serve with a flare and a touch of class, place you in the heart of hospitality. Your worldly perspective has you thinking of new synergies between luxury brands and five-star hotels for a multinational clientele.

As a world-class vacation destination, Vancouver has a vast variety of hospitality management and tourism careers. With the right qualifications, you could land yourself a fantastic job opportunity. Are your career needs being served? ITD will do it all for you!

Consider ITD Canada's Hospitality Program, with a faculty that emphasizes dynamic and forward-thinking, a vital quality in an industry that embraces change as a way of life. Add in ITD Canada's global approach to preparing students to be ready and willing to serve at a high degree and you have the hallmark of service quality. Upon completion of an ITD Canada's Hospitality Program, you will excel at all facets of the industry, including promoting sales of products and services, developing and marketing new concepts, and taking on more demanding leadership roles, such as hiring, training, organizing, and inspiring your staff.

Our American Hotel and Lodging Association (AHLA) certified programs will allow you to build a rewarding career in areas such as event planning, restaurants, hotels, resort clubs, cruise lines, casinos, and professional sports. Your training will include portfolio development, co-op opportunity, and entrepreneurship skills that will allow you to successfully enter and stay in the job market. At ITD Canada, "we do it all for you", so you can do it all in your new fantastic hospitality position.

Vancouver

Majestic snow-covered mountains, sparkling cool ocean, old-growth rainforests and beautiful coloured foliage; all four seasons make Vancouver one of the top five most beautiful and livable cities in the world. With a vast multicultural population, endless activities, and excellent infrastructure, Vancouver is welcoming to all visitors.

It boasts a uniqueness found only in the few places in the world, one where you can ski down the slopes and sail a boat all on the same day.

Vancouver's residents take pride in keeping their city safe, clean and green, as seen in the many new green initiatives, from LED buildings to community gardens. Vancouver's hotels, restaurants and businesses are rated as some of the best in the world.

Catering to any interest throughout the year, it is a hospitality and tourism mecca. If your dream is to land yourself one of the coveted hospitality management or tourism careers in a growing industry, then Vancouver should be your itinerary.

AYUMI TAKAHASHI

Graphics & Web Design Track - IT Diploma

I find it almost impossible to stay away from the latest and the coolest websites. It is an activity that fascinates me because creating beautiful and easy to navigate pages requires both artistic and technical skills. What do I want to be when I grow up? I want to create the best websites ever.

There are tons of places where one can study Graphics and Web Development. I was particularly interested in a post-secondary institution with a strong IT school. After making a list of pros and cons and going over what I considered the best options for me, I applied and received admission to ITD Canada's School of Information Technology.

I love working with HTML, CSS, and JavaScript. I believe I will never get tired of pushing the limits of what I can do with digital media. The value of the program lies in the practical training that is more and more important in a rapidly changing digital environment. With small classes, my instructors and I have more time to discuss my projects and my future work environment. I am also able to create long-lasting friendships with my peers. As an international student, the warm school community atmosphere is important.

“ITD CANADA IS THE PLACE FOR ME”

E-Commerce

Take your business dreams to the next level and launch your E-commerce startup, or join the “Cloud” and blaze new trails in the fast-growing web-centric environment. E-commerce is a key component for every business and specializing in this area will boost your revenue after graduation. Whether you want to launch or support online businesses, not just with technology, but with a creative understanding of consumer preferences and buying trends, E-commerce is a must. Throughout the program at ITD Canada, you will blend business with technology, improve your team-building skills, push your critical reading skills and rely on strong memorization abilities to learn web coding and design, marketing and advertising and information assurance and compliance. ITDCanada’s faculty will prepare you for the increasingly global work environment. Your training will include portfolio development, coop opportunity and entrepreneurship skills that will allow you to successfully enter and stay in the job market.

Embedded Programming

Nothing runs without code! From the upcoming Apple Watch to the pump at the gas station, and embedded code is everywhere. And you’re engineering a way to create even more new cool apps with your world-class code. Honestly, for you, Calculus is pretty cool and JeanBaptiste Fourier is your hero. Your power-smart embedded apps will leave a small carbon footprint and thrust you to the forefront of IT engineering and lead the way for ever-changing_ innovation.

Where does one go to change the digital world? ITD Canada is waiting for you. With more jobs than any other area of commerce in the last decade, computer technology continues to generate employment in almost every sector of the workforce. ITD Canada’s Embedded and Real-Time Program is lots of fun, personally satisfying and a creative outlet for the engineering mind. Learn to perfect the art of building embedded and real-time apps with the guidance of ITD Canada’s industry-experienced instructors. Your training will include co-op experience, portfolio development, and entrepreneurship skills that will allow you to successfully enter and stay in the job market.

Open Source Web Development

Are you inspired by the revolution in the IT industry using open source tools? Would you like the challenge of learning and building software and web applications using open source technologies like Ruby, Rupal, Joomla, etc?

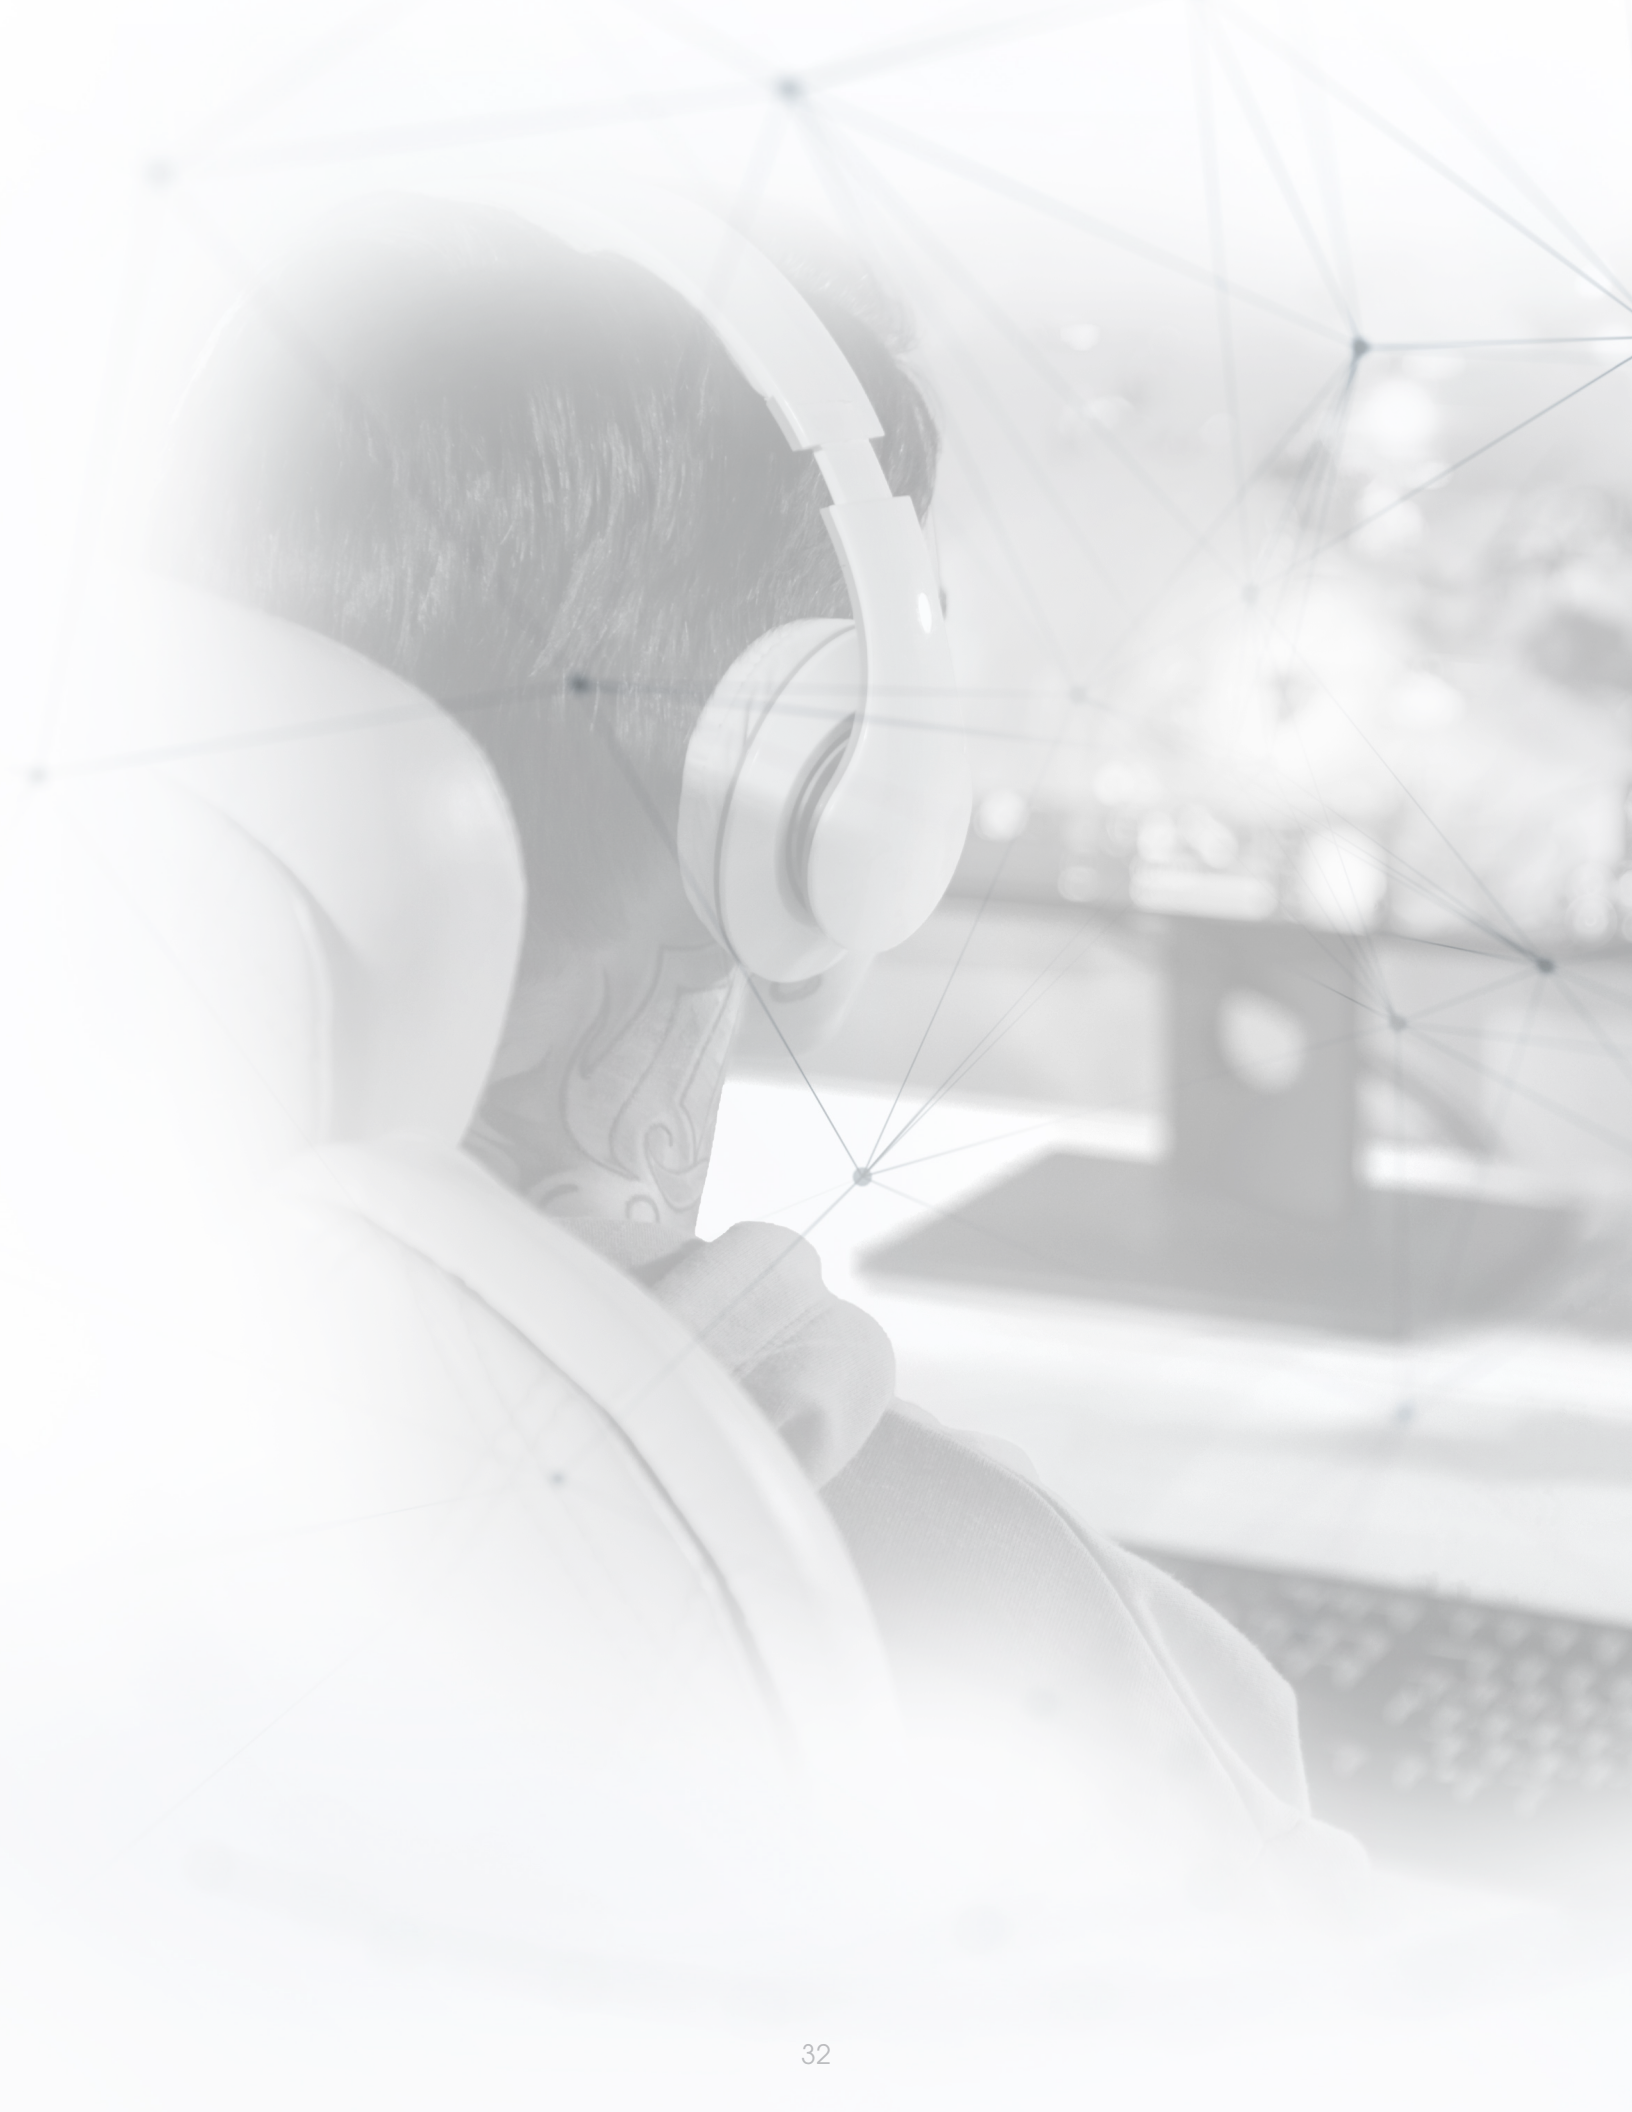

If you like the freedom that open source tools and software offer you, we have a sophisticated program for you that will make you an entry-level expert in web development using open source technology. you will be learning about state-of-the-art-technology, including Java, PHP, MySQL, Ruby, and multiple content management systems, as well as high-end javascript, JQuery and Ajax. This course will enable you to be at the core of the digital revolution era and create a network effect of flexibility and affordability for companies that expect to develop a customized customer experience.

Network Administration

The good news is that you are in demand! Big demand! You need a laundry list of tools and technologies to keep up with the latest and greatest mountains of network infrastructures. The environments is also a lot to worry about. Your best bet: ITD Canada.

The ITD faculty will help you get your head around all the different options and specialties. Getting your certificate or Diploma will be a surefire way to validate your skills and knowledge and advance your career in network administration. Your training will include co-op experience, portfolio development and entrepreneurship skills that will allow you to enter and stay in the job market successfully.

General Programming

What's the best-kept secret career in IT? A program analyst. Who will have a thriving career in the computer world? You will. What can you expect as a computer program analyst? A number of several exciting career opportunities are in high demand with excellent pay and great benefits. If you enjoy computers and keeping up on the latest technology, or are interested in cultivating valuable computer technology and programming skill that launches your career more quickly than you ever thought possible, then ITD Canada should be at the top of your educational training list.

ITD Canada's Program Analyst track is well suited to people who are interested in computers. The faculty brings a wealth of real-world experiences to the classroom. The program emphasizes problem-solving skills using the latest versions of Microsoft, Oracle, Java and open source software to develop enterprise, Internet and mobile applications. Your training will include co-op experience, portfolio development, and entrepreneurship skills that will allow you to successfully enter and stay in the job market.

Game Programming

Have you been chasing fun all your life? Can you spot Waldo before everyone else? can you solve the Rubik's Cube in less than 10 seconds? Is your motto, "Onward to victory?" or, is it "Play to win?" Games have changed and you're a game changer.

Getting a leg-up in game development, the newest entertainment field, is exciting. How quickly the field of digital entertainment has grown from traditional and classic board and card games to awesome games that embrace both system design and behavior design. Whether you are breaking in on your terms or looking to land on a game development team, the value lies in having training in visual artistry and systemic thinking, both an absolute necessity for game development.

ITD Canada is the gateway to improving or launching a career in game development. The ITD faculty are here to help you battle your way into the game industry with comprehensive training that identifies existing and emerging markets and products. Your training will include portfolio development, co-op experience and entrepreneurship skills that will allow you to successfully enter and stay in the job market.

Graphic & Web Development

Are you a maverick? Does your thinking challenge convention? push barriers aside, and lead you to discover uncharted web terrain. Do you find yourself at the intersection between design thinking, visual communication, technology, and user experience? Is shaping the future of experiential design and digital media on your bucket list? Then, hurry and start your adventure at ITD Canada!

In a rapidly evolving technology industry, ITD Canada's Graphic and Web Development Program addresses the demand for leading industry experts to prepare students as strategic thinkers, producers, and technologists ready to lead innovation. Your training will include portfolio development, co-op opportunities, and entrepreneurship skills that will allow you to successfully enter and stay in the job market.
